THEO

THE MAKE UP ARTIST

ART IS AN EXPRESSION OF HUMAN CREATIVE SKILLS AND IMAGINATION

Art involves many creative forms and cosmetology and make up artists are a part of the many existing but unique talented individuals.

In this ever changing twenty first century it is said that, what a man can do a woman can also do, and in this what a woman can do is not exceptional for a man to do.

Meet Theo the make artist, he has taken his serious passion for make-up and has inspired a lot people in the cosmetology industry.

Theo discovered his passion for cosmetology in the year 2014 while he was still in his 9th grade. Despite the many challenges that he faced because of something that is perceived to be woman's job, he remained resolute and determined to prove that it is not about the gender but the skill and the ability to deliver. He explains that the make up business is mostly dominated by the female folk and for that reason when starting he faced a lot of critiscm and support was inadequate.

THEO
THE MAKE UP ARTIST

"It was very challenging for me to grow when I was starting, because being a make -up artist is seen has as feminine, this made it hard for me to penetrate the industry," he explains.

Obviously for any person to start doing something, there is something that always awakens the sleeping giant within them, but Shockingly for Theo this was not the case.

He says his inspiration was from within, he says because he never liked having an oily skin, he practiced applying powder and make up on himself and the moment he saw that he was actually good at that, his sixth sense about actually doing this for a wage kicked in.

" Didn't like having an oily skin when going to school, so I started applying powder and make up on myself and it looked good on me," he adds " from there I practiced and got inspired, so inspiration was my best friend,"

The main distinguishing factor about Theo from other Make up artist is the fact that he likes to diversify his works by playing with color and amplifying his work, this is because he has observed that most people are always okay with their natural looks but for Theo he explains that sometimes make he his clients come out of their comfort zone to exhibit their true beauty.

"Most people want to look natural, but depending on the occasion I try to take the client out of their comfort zone depending on the occasion and if they are comfortable to experience a new look," he says.

Despite having this rich creative mind; Theo explains that he has never attended an cosmetology school and that he learnt everything through practice and watching a few videos from YouTube.

He however shares to up coming make up artists to consider attending some classes about cosmetology so as to learn fast and gain experience from the wide array of information

from professionals.

Theo has worked with a lot people and among the notable ones are Wezi and Bombshell, to which he has a cordial understanding.

"Wezi is my favourite client and best friend, Bombshell is sweet and has a nice personality, I wouldn't hesitate if was abroad and bombshell called me to come and work on her," he convincingly said.

In the next five years Theo hopes to work hard and gain an international recognition in his work, he also hopes to work with an international celebrity, this can be seen in his work ethic as he explains that he wakes up 03 to start his work because of the saying that says " All rich people have no sleep,"

Truly with determination like that of Theo the sky is the limit, despite the backlash and name calling that exists in the cosmetology industry for men hard work will prove a point.

Who We Are?

We are a branding and advertising studio that deals in graphic design, photography, web development & print.

Royda Bwalya Sikaneta

“
ALWAYS LEARN
FROM OTHERS AND
HAVE NO LIMITS.

R.B.S wear is a brand name derived from the name Royda Bwalya Sikaneta who is the soul owner of this house old proudly Zambia fashion wear company.

As Chief Executive officer of R.B.S. miss Sikaneta Discovered her talent and her interest in fashion designing at an early age and from there she grew fond of the fashion industry. As time went by she went to fashion designing school, this was the start of a serious journey in the life of miss Sikaneta.

For everything to happen some sort of inner inspiration is key, and for miss sikaneta, her source of inspiration is from within, she draws strength from her handwork and depending on the environment where she is working from to find her energy. Besides fashion designing, miss Sikaneta is a model and in fact she was the crowned plus size miss humanitarian 2020-2021, this has made it easy for her to create brand awareness for fashion wear designing.

Additionally, she explains that todays fashion industry is diverse and that's the reason why she designs both urban and traditional pieces. She however makes it clear that her pieces will always carry her signature touch which is traditional,explaining her obsession with the African print.

R.B.S exhibits and follows distinct principles in the fashion world which are;

- never to change the original style.
- always be unique
- always learn from others and have no limits.

And in addition to always thinking outside the box.

In the near future Royda sees her self as an established fashion designer and dreams of collaborating with the likes of **Peter My Life**.

Despite the challenges that come with being a model and the fashion industry especially those remarks linked to promiscuity in this business, Royda has remained resolute and thanks to her grandfather for the support he has always provided to her in perusing her dreams in the fashion industry.

Her word of advice to the up coming fashion designers and models is to always know who you are so that people don't describe you on your behalf. And finally here is a nugget you can keep in your mind When you think of R.B.S Fashion Wear, think the unique and distinct African Print that is exclusive to this brand.

The Brush to the Dream

Tapela Nyendwa

So what made u start doing make up?

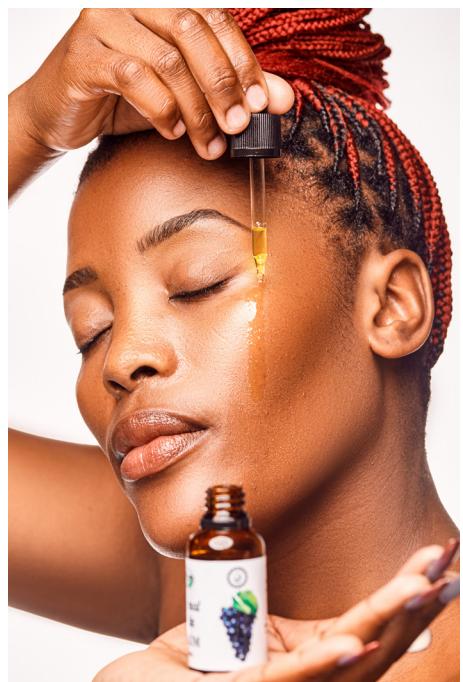

I started doing makeup because Of the passion and interest to improve my creative skills. I started doing makeup in 2018 but I was never confident of my looks so I could do a beat and wash off immediately am done taking pictures ,I started to improve with time and I become confident in the looks.

In 2019 after I completed my tertiary education (Secondary Teaching course) I decided to do more practice to become better on other people , before 2020 I realized I would make an income out of my talent and God willing I opened a shop in Kabwata Market in 2021 February till date I put all my effort to it because that's now a job for me by the way I did not go to any makeup school for makeup courses, it's been through consistence practice.

In 2022 I took part in two great competitions that I both scooped number 1 in the talent competition. (Miss My Hometown beauty pageant- Talent competition and TOO LEGIT ZAMBIA)

Elegancy is a life style

Spiwe our very own TLZ model out grows expectations by working on her craft puts herself out in the modeling industry to explore new art that she can add to her portfolio.
